Chapter 17 Practice Problems Allylic Carbocations and Conjugated Dienes

1. Draw all important resonance forms for the following carbocations using curved arrows to interconvert structures, and proper resonance signs:

$$\mathbb{R}^{\bigoplus_{\mathsf{CH}_2}}$$

2. Predict the products for the following SN1 reactions. Label the major product:

$$C$$
 $(CH_3)_2NH$

3. Explain the following observation:

the rate of the first reaction is 6000 times faster than the second

4. Predict the products of the following reactions with one equivalent each of the corresponding HX:
